Let's check slab pics with different vein types.

Bianco Orion Slab

There are three main types of the Bianco Orion Marble, the random veinings type (very good choice for TV background decoration, making it elegant and classic for your home), the diagonal veinings type (which is ideally used for book-match designs, especially for the floor and wall decorations. Some Bianco Orion Slabs with diagonal veinings look like the Volakas Marble, but the price is more economic, which is a good option for the commercial & residential projects), and the whiter base with fewer veinings type (suitable for elegant and high-end projects and unique house designs). Every type has unique color and appearance, and we have different quality slabs in our showroom in shuitou and blocks for you to choose from. Stocked in 18mm & 20mm slabs and blocks for your options.

The Application of Bianco Orion Marble

Bianco Orion marble is widely used for floor tiles & wall tiles, as well as thin tiles and mosaic tiles. Bianco Orion marble is also a perfect choice for kitchen countertops, island and bathroom vanity tops as for its hardness texture. OEM is available as per your requirements.
